Thane, Maharashtra, India

Summary

With 4 years of experience in the Information Technology industry, I specialize in Application Support and DevOps practices, combining technical expertise with a problem-solving mindset to deliver secure, scalable, and efficient solutions. My skill set spans API development & integration, DevOps pipelines, Docker, Kubernetes, Terraform, AWS, AI Agents, DevSecOps, and security testing tools.

Key Skills & Expertise

DevOps: CI/CD pipelines, infrastructure as code, container orchestration

Cloud: AWS services (EC2, S3, RDS, IAM, Lambda) with cost-optimized deployments

DevSecOps: Integrating SAST, DAST, and SCA security tools into development workflows

Application Security Testing: Vulnerability scanning, risk assessment, and mitigation strategies

Highlighted Projects

1## Automated CI/CD Pipeline with Jenkins & Terraform – Reduced deployment time by 60% for a microservices-based application.

2## Kubernetes Migration Project – Migrated containerized workloads to AWS EKS, improving scalability and reducing downtime.

3## Cloud Cost Optimization & Infrastructure Automation – Implemented Terraform for IaC, reducing cloud costs by 25%.

4## Security Testing with DevSecOps Tools (Recent) – Conducted a full application security assessment using SAST, SCA, and DAST tools on an OWASP Juice Shop app, identifying vulnerabilities and recommending remediation strategies.

My Mission

To bridge the gap between innovation and security—building solutions that deliver speed, reliability, and resilience without compromising safety.

Let's Connect

I'm always open to collaborating on challenging projects and exploring new opportunities in DevOps, Cloud Engineering, and Application Security. Recruiters and hiring managers — feel free to reach out!
